## TODAY'S BEST INVESTMENT FOR SMALL SAVERS

### NATIONAL SAVINGS CERTIFICATES

Available in three\* different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

3½%

TEN-YEAR TREASURY SAVINGS DEPOSITS.

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum, free of income-tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; so at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercara (Coorg).

\*For further information and/or rules governing these investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simla-3.

† Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth Rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D.D.—Dysentery and Diarrhoea ; R.D.—Respiratory Diseases ; M.D.—Maternal Deaths ; D.R.—Death Rate ; I.D.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for week ending the 26th September, 1953 relate to 152 towns with an estimated population of 20,926 thousands. The total number of towns is 296 and their population is 36,140 thousands. Thus 51% of the total number of towns representing 58% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,147 and 7,153 representing birth and death rates of 37.6 and 17.8 per thousand of population respectively.

(A) States (Parts A & C):—The data here relate to 121 towns with an estimated population of 16,971 thousands. Information about Madras and West Bengal could not be included. The total number of towns is 250 and their population is 30,790 thousands. Thus 48% of the total number of towns representing 55% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,895 and 6,065 representing birth and death rates of 39.5 and 18.6 per thousand of population respectively. The table at the end gives the position by States.

The towns of Sholapur in Bombay, Achalpur in Madhya Pradesh and Hathras in Uttar Pradesh recorded high death rates of 50.5, 52.0 and 61.7 per thousand of population respectively. The high death rate in Sholapur was mainly due to deaths from respiratory diseases and in Achalpur and Hathras the high death rates were mainly due to deaths from dysentery and diarrhoea and fevers.

(B) States (Part B):—The data here relate to 31 towns with an estimated population of 3,955 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 67% of total number of towns representing 74% of total population is covered. The numbers of births and deaths recorded in these towns were 2,252 and 1,088 representing birth and death rates of 29.6 and 14.3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
